Career Objective

Adaptable, Flexible and enthusiastic Software Engineer, got Bachelor of Science in Computer Science from University of Eldoret. Eager to utilize skills in System Administration, Graphics design, and ICT support to drive organizational growth. Led UI/UX initiatives on campus as the Google Developers Group Lead. Passionate about learning, innovation, and solving real-world challenges through technology and as a Certified Ethical Hacker and Networking Basics from Cisco academy always I ensure safety in the cycle of software development and enhances robust system security within the organisation.

Education and Professional Background

Bachelor of Science in Computer Science

University of Eldoret (UOE), 2025.

Skills Acquired:

System Administration, Database Administration, Network Administration, Graphic Designing, Security Management, System Development e.g web&app (HTML, CSS, JavaScript, C#, C, Java, Python, HCI, AI), Software Engineering, OS Administrations, Data Structures and Algorithms, Git and GitHub Expertise, Data Science and Artificial Intelligence applications.

Kenya Certificate of Secondary Education (KCSE)
Oriwo Boys' High School, 2020.

Kenya Certificate of Primary Education (KCPE)
Siany Primary School, 2016.

Technical Skills

Programming Languages: C, C#, C++, XML, HTML, CSS, JavaScript, PHP, Python, Java & Dart.
Frameworks & Libraries: Django, React, Flutter (Intermediate, Firebase integration experience).
Design Tools: Figma, Adobe XD, Packet tracer, Canva, Draw.io, Dribble and Canvas.
Databases: SQL, Firebase, MySQL & MySQL Workbench, Mongo and NodeJs

Version Control: Git (GitHub expertise).
Languages: Proficient in English and Kiswahili, Kenyan Sign Language Intermediate.
CEH: Certified Ethical Hacking Skills from Cisco Academy.
Networking Basics Cisco: Certified networking Basic Skills.

Professional Experience

ICT Officer Intern (System Administrator)

St. Joseph's Technical Institute for the Deaf, Nyang'oma

March 3rd,2025 to Present
General duties;

Maintenance of management information systems and services to;
Departments/Divisions/Units; maintenance of a computerized information database; design and maintain data protection system; implementing SJTTID ICT policy; planning implementing, monitoring and evaluating ICT Projects and Programmes; ensure availability of ICT services and advising on standards for application; coordination of user support to the departments; development and maintenance of a robust secure and scalable ICT infrastructure; installation and support servers in the LAN environment, including installation and deployment of relevant hardware and software; provision of information services through various formats including formal and technological; and coordination of ICT capacity development of staff.

Specific roles;

Maintaining support systems and training of users,
System Administrator roles, Website maintenance roles, Database Administration roles and Security Manager Roles.
Maintaining of Information Communication Technology equipment and associated peripherals,
Maintaining data protection system,
Installing and supporting servers,
Installing and deployment of relevant hardware and software, Performing technical, systems and user documentation.
Providing user support and training users.
Any other duties assigned.

Achievements:

Appointed a member in Principle and Evaluation Committee.
Appointed member to stand for publicity for the proposed open day committee.
Did data filtering and correspondence in the ERP Optimum System that we use in the Institute as System Administrator.
Expanded internet accessibility to remote areas of the campus, including the hostel, by installing IP isolation devices for secure access.

ICT OFFICER (Volunteer)

ST. BENARDS CHILDREN'S HOME, NYANG'OMA ORPHANAGE
July,2025 to Present

Key Contributions:
Assisting in Microsoft suite Operations like Microsoft Word, Microsoft Excel in operations and reports that are needed.
System CRUD operations that is create, read, update and delete the homes operations in our excel management system.
First- line Support.

Achievements:
Appointed to be the secretary of the orphanage during running of a little token for our babies and their caregivers.
Have been able to draft new letter head for our orphanage for the administrations use.
Made new format for the letters of release and intake of the babies that are more formal.
Wrote proposals to the outside world sponsors and managed to do some projects like chicken House.

Graphic Designer UI/UX (Volunteer)

Cloud Native Computing Foundation (CNCF) – Nairobi Community Volunteer Role: Community Volunteer: January – July 2025.

Key Contributions:
Assist in organizing CNCF Nairobi meetups, workshops, and events to promote cloud-native technologies.
Support technical sessions on Kubernetes, containerization, and cloud-native best practices.
Engage with community members by providing guidance on cloud-native learning resources and tools.
Collaborated with tech professionals to enhance the community's knowledge of CNCF projects.
Designing posters for coming events and making the presentation slides.

Achievements:
Learnt more and shared as Ui/Ux for the Kubernetes the essence of reading the documents as a future developer experts.
Designed logos and flyers for Nairobi community events that were posted on the main platforms and CNCF website for Africa.

Junior Penetration Tester

Protego Security Solutions
November 2024 – January 2025 - Remote

Key Responsibilities:
Conduct penetration testing and vulnerability assessments to identify weaknesses in network, systems, and applications.
Analyze and evaluate security risks and provide recommendations for remediation.
Develop and maintain reports detailing findings, risks, and recommendations.
Collaborate with IT and security teams to implement solutions and enhance cybersecurity defenses.
Stay up to date with the latest cybersecurity trends, tools, and best practices.

Achievements:
Wrote reports about system security breaches predicting future risks to company.
Tested every device and all the connectivity identifying any threat as part of threat analysis.

System Administrator (Attachment)

St. Joseph's Technical Training Institute for the Deaf, Nyang'oma
May - August 2024

Key Responsibilities:
Installed and configured computer hardware, software, LAN systems, printers, and scanners.
Conducted routine maintenance and repairs, including replacement of damaged peripherals.
Provided first-line support and troubleshooting for staff and students.
Contributed to developing the institution's ICT policy and ensured compliance with system security protocols.
Managed information security, communication lines, and equipment security.

Achievements:
Revived non-functional desktops by replacing hardware (RAM and hard drives) and installing new operating systems, ensuring all desktops in the institution were functional.
Expanded internet accessibility to remote areas of the campus, including the hostel, by installing IP isolation devices for secure access.

Leadership & Extracurricular Activities

Google Developers Group Lead - UI/UX
University of Eldoret - August 2024 to August 17, 2025

Organized workshops, hackathons, and training sessions to build UI/UX skills among students, attracting over 50 attendees per event.
Event Management: Planned monthly workshops covering topics like wire framing, prototyping, and user research.
Community Engagement: Mentored peers in design and development, fostering a collaborative environment for skills exchange.
Content Creation: Designed promotional materials using Figma and Adobe XD, supporting campus events and student businesses.
Industry Collaboration: Coordinated guest speakers to provide insights into tech industry trends and UI/UX practices.

World Skills Kenya Competition 2024 – Mobile Application Development

Awarded Bronze Medal and a Certificate of Participation for mobile app development.

University of Eldoret Innovations Fair (October 2024)

Participated in the 16th annual fair, receiving a certificate of recognition for contributions to tech and software projects.

Projects

Mobile Applications Developer
Developed and deployed mobile applications using flutter with Firebase backend integration. Created user-centered designs with Figma and Adobe XD, enabling efficient user interaction and cohesive design for cross-platform apps.

Penetration Testing at Protego Security Solutions
Successfully identified and reported critical vulnerabilities.
Successfully collaborated with development teams to remediate vulnerabilities.

Digital hub Establishment at St. Joseph's Technical Training Institute
This is an achievement have managed to do a proposal to the principal and have been approved for implementation and currently in motion and there are quite a number of services offered in the hub which: Digital Skills training entails ICT literacy, coding & programming, graphic designs, digital marketing and many more, Innovation and Entrepreneurship Support, Community learning opportunities (for women, youth and local groups), Internet-enabled workspaces and assistive technologies.

Certifications

Bronze Medal, Mobile Application Development World Skills Kenya, August 2024
Certificate of Participation University of Eldoret Innovations Fair, October 2024

Networking Basics (Cisco) – Certified and Verified: 7th January 2025
Certified Ethical Hacker (CEH) – Certified and Verified: 3rd January 2025
Google Campus UI/UX lead - August 2025
Cybersecurity and Emerging Technologies Awareness Training - September 9th 2025

Hobbies & Interests

Programming
As an enthusiast individual, I am really dedicated and also have made programming a hobby for me as it is in line with my professional skills.
Learning new skills
I like to learn new skills since technology is a fast moving trend, in order to keep myself always better I do a lot of learning in the related field.
Swimming
On the weekends I do some recreation for my health benefits when I also get to talk to my peers over the status of the projects we are handling.
Hiking
Keeping a sound mind indeed requires a lot and the mind is always attracted to new things so I always take some walk to acknowledge nature and appreciate the same.
E-Gaming
Internet gaming advances my skills of gamification when programming as a developer. It creates a lot of refreshments when I take a break from coding.
Solving puzzles
To improve logic and critical thinking skills I do solve puzzles challenges.
